

Honeywell Fall Prevention and Protection Training

Providing world class training for maintaining a safe work environment

- Experienced instructors, live demonstrations and hands-on training
- Instructors are Qualified Person per OSHA's Walking Working
- Surfaces rule
- Open Enrollment Courses available in over 30 cities in US and Canada
- Addresses site-specific variables and performance requirements for a variety of applications and work site needs
- Online booking tool enables customers to review and reserve available open enrollment courses with a few simple clicks:
millerfallprotection.com
- Each participant will receive a certificate after successful course completion
- All courses require a minimum number of participants

AT HEIGHT TRAINING

Fall Protection Rescue (Basic Rescue)

This course is designed for any supervisor or personnel working at heights in construction or general industry. This course teaches the basics of self-rescue as well as assisting a fall victim. Participants will expand their rescue skills as well as better understand the requirements of OSHA, ANSI and CSA as it applies to rescue. Participants will be involved in practical hands-on work and should dress accordingly.

Course Length: 16 hours (2-day course)

Time: 8 a.m. to 5 p.m.

Cost: \$975 per participant

Fall Protection Rescue (Advance Rescue)

This course is designed for all personnel who work at heights, particularly on open structures. Individuals are taught the required skills to safely set up rescue equipment to rescue victims stranded at height, having first taken into consideration the likely injuries sustained. This course involves both multi-media presentations and hands-on workshops that require participants to actively climb and perform rescues with our instructors' guidance. Participants should dress accordingly.

Prerequisite Training: Competent Person OR Fall Protection Rescue (Basic Rescue)

Course Length: 16 hours (2-day course)

Time: 8 a.m. to 5 p.m.

Cost: \$1075 per participant

Authorized Tower Climber / Rescuer

This course is designed for new tower climbers. This fast paced training program meets the National Association of Tower Erectors climber training standards. The program provides climbers with a comprehensive overview of the highest regulatory and safety standards in the industry – Including OSHA, ANSI, and State Plan regulations and standards. The training provides

individuals with the required skills and knowledge to safely recognize, evaluate and control hazards related to tower work. It also teaches participants climbing techniques, proper selection of fall protection equipment and how to properly plan, set up rescue equipment, and rescue a victim through simulated drills. This course includes both classroom and hands-on training

Course Length: 16 hours (2-day course)

Time: 8 a.m. to 5 p.m.

Cost: \$895 per participant

Also available in Spanish

Competent Tower Climber / Rescuer

This course is designed for experienced climbers. This course includes both classroom and hands-on training. Participants will experience climbing and rescue scenarios beyond rescue scenarios covered in the 16-hr Authorized Climber training class. This fast paced training program meets the National Association of Tower Erectors climber training standards. The program provides climbers with a comprehensive overview of the highest regulatory and safety standards in the industry – Including OSHA, ANSI, and State Plan regulations and standards. The training provides individuals with the required skills and knowledge to safely recognize evaluate and control hazards related to tower work. It also teaches participants climbing techniques, proper selection of fall protection equipment and how to properly plan, set up rescue equipment, and rescue a victim through simulated drills.

Prerequisite: 16-hr Authorized Tower Climber class & 90 days climbing experience documented.

Course Length: 16 hours (2-day course)

Time: 8 a.m. to 5 p.m.

Cost: \$895 per participant

Also available in Spanish

FALL PREVENTION & PROTECTION AWARENESS TRAINING

Fall Prevention & Protection Awareness (User) Training

A four-hour awareness course designed for individuals with daily or weekly exposure to fall hazards. Designed for Non-supervisory personnel with limited knowledge of fall hazards or protection procedures. Participants gain knowledge and skills necessary to identify and avoid hazards associated with elevated work locations. The course features a series of presentations, demonstrations and hands-on exercises.

Course Length: 4 hours (1/2 day course)

Time: 8 a.m. to 12 p.m.

Cost: \$225 per participant*

COMPETENT PERSON TRAINING

Construction Industry

This intermediate level course is designed for Construction Industry employees who serve as the "competent person" required by OSHA 1926.32(f), and 1926.500 regulations. Participants are provided detailed classroom theory with hands-on tasks that require evaluation for fall hazards. This course also supplies the participant with the knowledge and skills to perform the semiannual and annual inspection.

General Industry

This intermediate level course is designed for General Industry employees who serve as the "competent person" under OSHA's walking-working surface standard; OSHA 1910. Participants are provided detailed classroom theory with hands-on tasks that require evaluation for fall hazards. This course also supplies the participant with the knowledge and skills to perform the semiannual and annual inspection. Subpart D & I are reviewed.

Course Length: 16 hours (2-day course)

Time: 8 a.m. to 5 p.m.

Cost: \$850 per participant*

Honeywell Safety Institute 2018 Open Enrollment Course Listing

Competent Person Refresher

8-hour Fall Prevention & Protection training course designed for previously trained competent persons. This training course covers the highlights and most recent changes required by OSHA 1926.32(f), 1926.500 and 1910 fall protection standards for General Industry and Construction. Course highlights include work applications and scenarios as well as new regulatory and fall protection product developments.

Prerequisite: 16-hr Competent Person current certificate must accompany registration

Course Length: 8 hours (1-day course)

Time: 8 a.m. to 5 p.m.

Cost: \$495 per participant*

(If attend day one of 16-hr class: \$565 per participant)

Competent Person for the U.S. Military

This three-day course is designed for facility workers and site supervisors who must also serve as the competent person in fall protection required by OSHA 1926.32(f), 1926.500 and 1910 standards. The training also provides experience, methodology and in-depth look at all standards (ANSI) and regulations (OSHA) covering inspection of personal fall arrest systems. Participants are assigned tasks which require evaluation for fall hazards. The tasks are described using real-life site photos. The training provides more detailed coverage of the Fall Prevention & Protection Training course materials and the following program topics. The course also supplies the participant with the knowledge and skills to perform the annual inspection and record keeping.

Course Length: 24 hours (3-day course)

Time: 8 a.m. to 5 p.m.

Cost: \$1,175 per participant

24HR Competent Person EM385.1 Fall Protection Training for USACE & Contractors

This course is designed for facility and site supervisors who must also serve as the competent person required by EM385-1-1 Army Corps of Engineers requirements. The training provides detailed coverage of fall prevention and protection, roles of the worker, building a fall protection system, pre-use and component person inspection, and recognizing evaluating and controlling the risks or hazards. As requested by the USACE this course covers Section 1, 21, & 24 in the EM 385.1 manual.

Course Length: 24 hours (3-day course)

Time: 8 a.m. to 5 p.m.

Cost: \$1,175 per participant

Refresher Length: 8-hours (1-day course)

Time: 8 a.m. to 5 p.m.

Cost: \$600 per participant

FALL PROTECTION INSPECTION TRAINING

Fall Protection Equipment Inspection

The Fall Protection Equipment Inspection Course provides experience, methodology and in-depth look at all ANSI standards and OSHA regulations covering inspection of personal fall arrest systems. It is designed for a tool crib worker who needs to inspect the equipment prior to issuing to the users, but does not have the level of responsibility the competent person does, or for the newly trained "competent person" who is responsible for the annual inspection of personal fall arrest systems.

Course Length: 8 hours (1-day course)

Time: 8 a.m. to 5 p.m.

Cost: \$525 per participant*

Also available in Spanish

**Order both Competent Person and Fall Protection Inspection Training for a discounted cost: \$1,175.00. Both courses must be attended on consecutive days.*

CONFINED SPACE TRAINING

Confined Space & Confined Space Entry

This entry level course is designed for individuals responsible for confined space entry, planning, supervising, or for administrating employees that work in confined spaces in both general industry and construction. A detailed review of confined space regulations, typical atmospheric, physical, and mechanical hazards are taught and explained. Control measures are provided along with a number of application exercises focusing on confined space equipment, inspection, gas detection and atmospheric testing, and non-entry and entry rescue are discussed and reviewed. **This confined space course meets or exceeds OSHA 7300, 29 CFR 1910.146 and 29 CFR 1926.1200 – 1213 (permit required confined space regulations requirements).**

Course Length: 16 hours (2-day course)

Time: 8 a.m. to 5 p.m.

Cost: \$925 per participant

Confined Space Rescue

The Confined Space Rescue course will teach rescue techniques for workers who work in areas with limited or restricted entry and exit. This course is applicable with 29 CFR 1910.146 Subpart J, better known as Permit Required Confined Spaces. A review of the Confined Space OSHA regulations, rescue regulations and application of various confined space entry/rescue equipment with hands-on rescue skill training will be included.

Prerequisite Training: Confined Space & Confined Space Entry Training

Course Length: 8 hours (1-day course)

Time: 8 a.m. to 5 p.m.

Cost: \$550 per participant

OSHA TRAINING

OSHA 10-Hour Construction

This 10-hour training course meets OSHA 29 CFR 1926 requirements. Upon successful completion of the course, participants will receive a course completion card. All participants will take a pre-test followed by class work on required and selected OSHA topics.

Course Length: 2-day course

Time: 8 a.m. to 2 p.m.

Cost: \$295 per participant

OSHA 10-Hour General Industry

This 10-hour training course meets OSHA requirements for providing general industry workers awareness in recognizing and practicing around hazards at a general industry site. Upon successful completion of the course, participants will receive a course completion card. All participants will take a pre-test followed by class work on required and selected OSHA topics.

Course Length: 2-day course

Time: 8 a.m. to 2 p.m.

Cost: \$295 per participant

OSHA 30-Hour Construction

Construction professionals at every level will learn to identify the most common hazards found on construction sites, locate the correct standard in 29 CFR 1926 and discuss various construction processes, materials and equipment. Participants will receive the 30-hour construction card upon course completion.

Course Length: 4-day course

Time: 8 a.m. to 5 p.m.

Cost: \$695 per participant

OSHA 30-Hour General Industry

This introductory course was developed by OSHA for general industry personnel to learn about occupational safety and health and OSHA standards. All participants will receive the 30-hour general industry card upon completion of the course.

Course Length: 4-day course

Time: 8 a.m. to 5 p.m.

Cost: \$695 per participant

OSHA Residential Fall Hazards

This 8-hour course is designed for residential construction workers, working six feet or more above a lower level and will help participants understand OSHA's 29 CFR Part 1926, STD 03-11-002 Compliance Guidance for Residential Construction. This course will instruct participants on the new OSHA 1926.501K regulation for contractors working on residential rooftops and will basic fall protection and personal fall protection systems that will help lessen or eliminate potential fall hazards during the numerous stages of residential construction.

Course Length: 8 hours (1-day course)

Time: 8 a.m. to 5 p.m.

Cost: \$595 per participant

OIL AND GAS TRAINING

AWARE IADC/RIGPASS Orientation

This course is designed to educate employers and employees on the recognition, avoidance, and prevention of hazards specific to the Oil and Gas industry. Using a picture-based curriculum, AWARE, proves to relate safety hazards in a practical and clear manner for employees. This course is delivered in 13 modules that must equal 8 hours of total training. This program is accredited by the IADC RigPass Program and meets SafeLandUSA endorsement criteria. The presenter is an approved RigPass Instructor.

SafeLandUSA

Reference Text: OSHA 29 CFR 1926, 1910, OSHA 5810.

Course Length: 8 Hours (1-day course)

Time: 8 a.m. to 5 p.m.

Cost: \$245.00

TRAIN THE TRAINER

Train the Trainer Programs are designed to supply the participants with the knowledge & tools to develop their own training. Participants are not allowed to use, copy or replicate Honeywell training programs

Fall Protection Train the Trainer for the Qualified Person

Fall protection has developed over the years into a complex field of safety engineering; the subject matter of this four-day comprehensive course is complex and dynamic. It is designed to give the participants knowledge in very specific areas. Course is designed for Supervisory Personnel, Safety Managers, Foremen, Crew Chiefs and Job Site Superintendents who are responsible for providing fall protection training. We require those attending have attended other fall protection classes including basic knowledge on principles, practices, and terminology. This is NOT a training course on fall protection and is designed to assist you to the qualified person level. This class reviews the competent person and walking working sections of the OSHA regulations. This program will give you enough training material for the student to create their own fall protection program for their company.

This class is intended for an experienced individual who is responsible for providing fall protection training to their employee(s) at awareness/authorized user level. It does NOT deem the participant a Qualified Trainer upon completion. That is the employer's requirement.

Prerequisite Training: Miller by Honeywell's 16-hr Competent Person

Course Length: 32 hours (4-day course)

Time: 8 a.m. to 5 p.m.

Cost: \$2,100 per participant

Wind Energy Train the Trainer

The rapid growth and interest in wind energy over the past few years have resulted in a variety of safety issues and concerns with little regulatory influence or guidance. The training content in this 4-day comprehensive course is complex and dynamic, while providing participants with an in-depth insight and understanding of the specific safety challenges facing this industry. Adult training techniques are key components of this training course. All participants are asked to conduct a mini-training course as part of the curriculum.

Course Length: 32 hours (4-day course)

Time: 8 a.m. to 5 p.m.

Cost: \$2,100 per participant

Honeywell Safety Institute 2018 Open Enrollment Course Listing

Confined Space Train the Trainer

This course is designed to teach participants how to teach and develop their own confined space training program for their place of employment. It teaches skills and offers an in-depth review of regulations from 29 CFR 1910.146 Subpart J – Permit Required Confined Spaces.

Prerequisite Training: 2-day Confined Space & Confined Space Entry AND 1-Day Confined Space Rescue.
(Total 4-day price: \$2,075)

Course Length: 8 hours

Time: 8 a.m. to 5 p.m.

Cost: \$800 per participant

WIND ENERGY TRAINING

Wind Energy 8-Hour Basic Height Safety

The Wind Energy Basic Height Safety Training Course is basic work-at-height training for individuals who are not directly employed as wind energy engineers or technicians, but who may have an occasional need to climb a wind turbine under supervised conditions. This is an 8-hour classroom course.

Course Length: 8 hours

Time: 8 a.m. to 5 p.m.

Cost: \$675 per participant

Wind Energy 16-Hour Competent Climber

The rapid growth and interest in wind energy over the past few years have resulted in a variety of safety issues and The Wind Energy Competent Climber Training Course fulfills the basic work-at-height training requirements for field technicians and engineers employed within the wind energy sector. The first day is all classroom; day two is hands-on application training. Wear climbing shoes and jeans.

Course Length: 16 hours (2-day course)

Time: 8 a.m. to 5 p.m.

Cost: \$1025 per participant

ON-SITE TRAINING AT YOUR FACILITY OR WORK-SITE

On-Site/Contract

Honeywell is the leading provider of on-site training options, conveniently held at your facility or work-site. Schedule one of our Training experts to work with your employees in their own environment. Classes encourage instructor/student interaction to prevent a “lecture” atmosphere.

Basic Requirements (Fall Protection Courses):

- Electrical outlets for equipment
- Flip chart, markers, easel / White wall or projection screen
- Dedicated table for instructor for equipment (front of Class)
- Meeting room to accommodate expected number of participants
- Orientation, Awareness and Competent Person courses require anchor point that can support 2X the weight of the heaviest person in the class

Request a Quote for On-Site, Contract
Training: www.millerfallprotection.com

Additional Requirements for Specialty Courses:

- Authorized Tower Climber / Rescuer & Competent Tower Climber / Rescuer Training; tower, scaffolding, or approved multi-level surface to perform the hands on portion of the class
- Basic Rescue; tower, scaffolding, or multi-level surface to perform the hands-on portion of the class
- Confined Space Rescue; a clean and cleared vessel in which to perform horizontal and vertical rescue
- High Access Rescue; tower, scaffolding, or multi-level surface to perform the hands-on portion of the class
- Wind Energy Competent Climber; wind nacelle to perform hands on exercises

All open enrollment classes can be quoted for on-site training. In addition to the advertised classes, we also offer:

- Walking Working Surfaces for General Industry
- Aerial Work Platform
- Haz Comm, HazMat, Hazwoper
- Competent Person for the Construction Industry
- First Aid, CPR, AED (Heartsaver)

**SELF-CONTAINED BREATHING APPARATUS (SCBA)
AND SUPPLIED-AIR RESPIRATOR (SAR) CERTIFIED
TECHNICIAN TRAINING COURSES**

Panther™/Cougar™ SCBA and Panther Hip-Pac®/SAR Systems

This training course is designed to instruct personnel who will be responsible for repair, maintenance, documentation, and troubleshooting of the Panther/Cougar SCBA and/or Panther Hip-Pac/SAR systems. Participants will expand their knowledge regarding government and industry standards and regulations affecting maintenance and use of these systems. Participants will be involved in practical, hands-on, rebuild and testing of these pneumatic systems.

NOTE: Panther Hip-Pac®/SAR certification is an optional class held on day two of the Panther/Cougar SCBA course.

Course Length: 16 Hours (2-day course) Time: 8 a.m. - 5 p.m. (in CA: 7:25 a.m. - 5 p.m.) Cost: \$350.00

SCBA/SAR Re-Certification

This course is designed to allow personnel who hold current Panther™, Cougar™, and Warrior SCBA or Panther Hip-Pac®/SAR system Technician certification an efficient, skill-based course to validate and renew their certification. Participants will be required to provide PosiChek3 flow test results as evidence of current work on the pneumatic systems (PosiCheck3 is a calibrated piece of test equipment utilized to verify that the pneumatic systems are working appropriately to meet government standards).

Prerequisites: Evidence of current Panther™, Cougar™ or Warrior SCBA and/or Panther Hip-Pac®/SAR System certification. In addition, PosiChek3 flow test results (5 test results per system) must be performed within 90 days of the re-certification course.

Course Length: 8 Hours (1-day course) Time: 8 a.m. to 5 p.m. (in CA: 7:25 a.m. - 5 p.m.) Cost: \$195.00

Titan™ Series SCBA

This training course is designed to instruct personnel who will be responsible for repair, maintenance, documentation, and troubleshooting of the Titan™ SCBA and/or Panther Hip-Pac®/SAR systems. Participants will expand their knowledge regarding government and industry standards and regulations affecting the maintenance and use of these systems. Participants will be involved in practical, hands-on rebuild and testing of these pneumatic systems.

NOTE: Panther Hip-Pac/SAR certification is an optional class held on day two of the Titan SCBA course.

Course Length: 16 Hours (2-day course) Time: 8 a.m. – 5 p.m. (in CA: 7:25 a.m. – 5 p.m.) Cost: \$395.00

Warrior™ to Titan™ SCBA Technician Re-Certification

This course is designed to allow personnel who hold current Warrior SCBA Technician certification an efficient, skill-based course to update and transfer their current Warrior certification to the Titan SCBA. Participants will be required to provide PosiChek flow test results as evidence of current work on Warrior SCBA systems.

NOTE: Panther™, Cougar™ SCBA and Panther Hip-Pac®/SAR re-certification may also be accomplished during the Warrior™ SCBA to Titan™ SCBA Re-certification and Update Course. The following prerequisites apply.

Prerequisites: Evidence of current Warrior SCBA certification and 5 PosiChek flow test results personally performed by the participant and dated within 90 days of this re-certification course.

Course Length: 8 Hours (1-day course) Time: 8 a.m. – 5 p.m. (in CA: 7:25 a.m. – 5 p.m.) Cost: No Charge

FALL PROTECTION TRAINING

End-User Fall Protection

This 8-hr course provides the participants with a general understanding of the fundamentals of fall protection; regulations that apply to fall protection; methods of eliminating fall hazards; equipment specifications, care, use, limitations and inspection; and fall protection planning requirement and importance. Through a combination of lectures and practical exercises, students are exposed to best practice instructions on the use, limitations, care and maintenance of fall protection. This course includes regulatory or provincial standards.

Course Length: 8 hours

Time: 8 a.m. to 5 p.m.

Call for cost: 855.565.6722

Qualified Person

This two-day intermediate level course is designed for a variety of industries and can be customized to suit the needs of the work environment. This course contains a combination of lectures, practical activities and knowledge verifications. Program content includes but is not limited to covering competency, due diligence, applicable Canadian and Provincial legislation and standards, CSA, with an overview of OSHA and ANSI. The course also supplies the participant with the knowledge and skills to perform equipment inspections.

Course Length: 16 hours

Time: 8 a.m. to 5 p.m.

Cost: \$850 per participant*

Qualified Inspector of Fall Protection Equipment

This one-day course is designed to provide the participants with the inspection criteria as per CSA, ANSI and the applicable regulatory body. Tools that will aid the inspector in the successful development, implementation and maintenance of a documented and scheduled fall protection inspection program in the workplace will also be provided. This course is delivered through a combination of instructor led presentation, hands on practical activities and theory or knowledge verifications.

Prerequisite: Honeywell Fall Protection Qualified Person

Course Length: 8 hours

Time: 8 a.m. to 5 p.m.

Cost: \$550 per participant*

** Order and attend both Qualified Person and Qualified Inspector of Fall Protection Equipment on consecutive days to be eligible for a discount.*

Fall Protection Train the Trainer

This four-day course is designed to provide participants with tools as an instructor to design and deliver fall protection course materials. Instructing is a unique skill set and requires confidence, organization, subject knowledge and content. The Trainer provides insight on how adults learn, process, and use information. The course combines activities, participant presentations and knowledge verifications. Fall Protection Train the Trainer provides a complete instructor package that includes Qualified Person and Qualified Inspector of Fall Protection Equipment.

Course Length: 4 days

Time: 8 a.m. to 5 p.m.

Cost: \$2,100 per participant

Working at Heights Fall Protection *Ministry of Labour Approved Program for Ontario*

This one-day course is designed for workers who may perform construction related activities and at times be required to work at heights where fall protection is required. The program provides workers and supervisors with the necessary knowledge required to safely work at heights and prevent fall related accidents. This program is compliant with Ontario regulation 213/91 section 26 and meets all requirements of both the New Working at Heights Program Standard and Training Provider Standard.

Course Length: 1 day

Time: 8 a.m. to 5 p.m.

Cost: \$185 per participant

Working at Heights Fall Protection Refresher *Ministry of Labour Approved Program for Ontario*

This half-day course is designed for workers who already hold the original 8-hr working at heights certificate. Certificate must be accompany registration.

Course Length: 1/2 day

Time: 8 a.m. to 12:00 p.m. or 12:30 p.m. – 4:30 p.m.

Cost: \$145 per participant

OIL SANDS SAFETY ASSOCIATION (OSSA) TRAINING

Oil Sands Safety Association (OSSA) approved training programs meet the required safety standards to help create an “incident-free” workforce.

OSSA Fall Protection

This 8-hr course provides the participants with a general understanding of the fundamentals of fall protection, regulations that apply to fall protection, methods of eliminating fall hazards, equipment specifications, care, use, limitations, inspection, fall protection planning requirements and importance. The course consists of a combination of lectures, practical exercises, group activities and knowledge verifications.

Course Length: 8 hours / 4-days (Train the Trainer)

Time: 8 a.m. to 5 p.m.

Call Office for details: 855.565.6722

OSSA Elevated Work Platform

This 8-hr course provides participants with the knowledge and general understanding of the legislative standards, preoperative checks, machine selection and safe operation of Elevated Work Platform (EWP) equipment. Through a combination of lectures and practical exercises participants are exposed to best practice instructions on the use, limitations, care and maintenance of EWPs. This course includes regulatory and provincial standards.

Prerequisite: OSSA Fall Protection

Course Length: 8 hours / 2-days (Train the Trainer)

Time: 8 a.m. to 5 p.m.

Call Office for details: 855.565.6722

OSSA Confined Space Entry and Monitor

This 6-8 hr. course is designed to ensure that all participants demonstrate the basic knowledge and proficiency in the classification and identification of hazards associated with working in confined spaces and the identification of restricted spaces. Workers required to enter a confined or restricted space must be trained in the recognition of the risks and hazards associated with confined or restricted space entry and monitoring, and understand the methods of controlling these associated risks and hazards.

Course Length: 6-8 hours / 2-days (Train the Trainer)

Time: 8 a.m. to 5 p.m.

Call Office for details: 855.565.6722

OSSA Fire Watch

This 4-6 hr. course is designed to ensure that all participants demonstrate basic knowledge and proficiency in the classification and identification of types of fires and extinguishers. Participants must also demonstrate knowledge of the care, use and limitations of a fire extinguisher.

Course Length: 4-6 hours / 2-days (Train the Trainer)

Time: 8 a.m. to 3 p.m.

Call Office for details: 855.565.6722

OSSA TRAIN THE TRAINER

OSSA Fall Protection Train the Trainer

This course is designed for instructors required to provide fall protection training and is a combination of Qualified Person Fall Protection, Qualified Inspector of Fall Protection Equipment and Fall Protection Train the Trainer. Instructors will be taught a general understanding of the fundamentals of fall protection; regulations that apply to fall protection; methods of eliminating fall hazards; equipment specifications, care, use, limitations and inspection; and fall protection planning requirements and importance. Instructing is a unique skill set and requires confidence, organization, subject knowledge and content familiarization. This course provides insight on how adults learn, process and use information through instructor lead presentations, group activities, participant presentations and knowledge verifications. Participants will be provided with tools as an instructor to deliver course materials through a combination of Train the Trainer, instructor guides, co-teach and observation sessions.

Course Length: 4 days (32 hrs.)

Time: 8 a.m. to 5 p.m.

Cost: \$2,100 per participant

OSSA Elevated Work Platform Train the Trainer

This course is designed for instructors required to provide elevated work platform training and includes subject matters covered in OSSA Fall Protection. Instructors will be taught the theory behind the legislative standards, preoperative checks, machine selection and safe operation of Elevated Work Platform (EWP) equipment. Through a combination of lectures and practical exercises, instructors are exposed to best practices on the use, limitations, care and maintenance of EWPs. This course includes regulatory and provincial standards. Instructing is a unique skill set and requires confidence, organization, subject knowledge and content familiarization. This course provides insight on how adults learn, process and use information through instructor lead presentations, group activities, participant presentations and knowledge verifications. Participants will be provided with tools as an instructor to deliver course materials through a combination of Train the Trainer, instructor guides, co-teach and observation sessions.

Course Length: 2 days (16 hrs.)

Time: 8 a.m. to 5 p.m.

Call Office for details: 855.565.6722

OSSA Confined Space Entry and Monitor Train the Trainer

This course is designed for instructors who are required to provide confined space entry and monitor training. Instructors will be trained to recognize the risks and hazards associated with confined spaces and the methods of controlling them. Additionally, classification of confined space, legislation, standards and code of practice will also be learned. Instructing is a unique skill set and requires confidence, organization, subject knowledge and content familiarization. This course provides insight on how adults learn, process and use information through instructor lead presentations, group activities, participant presentations and knowledge verifications. Participants will be provided with tools as an instructor to deliver course materials through a combination of Train the Trainer, instructor guides, co-teach and observation sessions.

Course Length: 2-days (16 hrs.)

Time: 8 a.m. to 5 p.m.

Call Office for details: 855.565.6722

OSSA Fire Watch Train the Trainer

This course is designed for instructors required to provide fire watch training and includes knowledge and proficiency in the classification and identification of types of fires and extinguishers. Instructors will be required to demonstrate their knowledge of the care, use and limitations of a fire extinguisher. Through a combination of lectures and practical exercises, instructors are exposed to best practices, regulations and standards, including Alberta Occupational Health and Safety, Alberta Fire Code and National Fire Protection Agency. Instructing is a unique skill set and requires confidence, organization, subject knowledge and content familiarization. This course provides insight on how adults learn, process and use information through instructor lead presentations, group activities, participant presentations and knowledge verifications. Participants will be provided with tools as an instructor to deliver course materials through a combination of Train the Trainer, instructor guides, co-teach and observation sessions.

Course Length: 2-days (16 hrs.)

Time: 8 a.m. to 5 p.m.
